

EUROPEAN SOCIAL FORUM ATHENS 2006

Migrations Program

Against the regression of the rights, let us act together !

The fourth ESF gives a strong place to the migrations struggles, analyses and demands and shows the strength of European movement who refuse to support public policies leading to more discriminations and exclusion. More or less every day we can find all over Europe: protests and campaigns for the right to stay and equality, carried by self-organisations of refugees and migrants or by various migration-related initiatives.

These struggles fight again the so-called migration management, “which is not simply aimed at keeping refugees and migrants out of Europe, but rather at promoting a process of selective inclusion, also through illegalization, of the migrants. Our discussing underlined the process that build precariousness from the poorest to the all society ; from the without paper to the all labour market , from the specific rights to all our rights...

Our organizations, coming from many European and African countries :
